

Data Sources for the Interactive Maps

The interactive treatment court map experience provides an overview of the total number of treatment courts in the United States and its territories as of December 31, 2020. The information was collected by court type at the state and county level. In addition, data were gathered from four other sources to provide greater insight into a given geographical region. The four sources include the FBI Uniform Crime Report, the Centers for Disease Control & Prevention, National Highway Traffic Safety Administration, and United States Census Bureau. The section below lists the data variables and the organization, agency, and/or report from which they were gathered:

Federal Bureau of Investigations (Uniform Crime Report)

SOURCE: fbi.gov/services/cjis/ucr

State-Level

Violent crime rate per 100,000 persons (2019)
Property crime rate per 100,000 persons (2019)
Arrest rate for driving under the influence (DUI)
per 100,000 persons (2018)

County-Level

Violent crime rate per 100,000 persons (2016)
Property crime rate per 100,000 persons (2016)

Centers for Disease Control & Prevention

SOURCE: cdc.gov

State-Level
